

ADDITIVE

> Characteristics

The characteristics of this product are identical to the product with 6 or 10 function keys.

> Radio recognition

It is necessary for all handsets added to a kit or replacement handsets to undergo radio recognition!

- Carry out the radio recognition using:
 - each of the handsets if the installation has several,
 - each of the buttons of the external caller unit if it has 2 call buttons,
 - each of the external caller units if the installation has two.
- Radio recognition enables each handset to identify the external caller unit(s) connected to it. Carry out the following procedure.

p 108

- 1 Open the controllers cover and press the small pushbutton.

- 2 On the other side of the pillar press the call button on the caller unit. It will start to beep.

You have 20s to carry out step 3.

- 3 During the BEEPING, press and hold the handsets  and  keys simultaneously, that correspond to the caller unit until the handset emits a resonant BEEP and shows the  symbol

NB: if there has been neither a beep nor a display, radio recognition has failed. Start the procedure again from the beginning ensuring you leave at least 3 seconds between pressing the button on the controller and the button on the external caller unit, and that you keep the handset at least 2m from the controller.
