

Compass

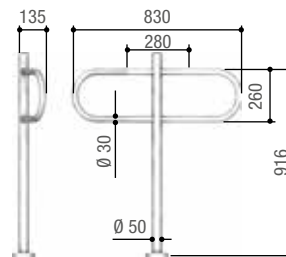

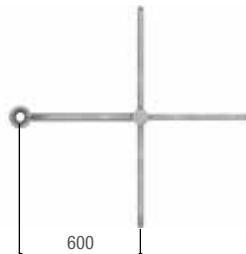

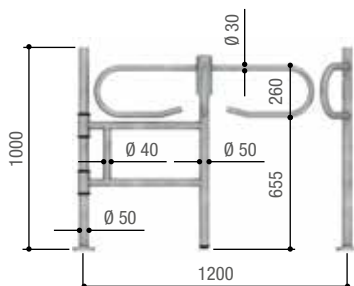

Mechanical turnstiles

The ideal range for controlling pedestrian access

- Compass is the simple, inexpensive solution for guiding flows in an orderly, efficient way in any size of shopping centre, from small shops to hypermarkets.
- It can also be used in swimming pools, sports centres, fitness/wellness centres, amusements parks, etc.
- Mechanical turnstile with four arms, enabling one person at a time to pass through in both directions.
- The AISI 304 steel structure makes Compass a product suitable for outdoor installations.
